Brixworth Rural District Council

Members of the Public Health Committee :

Mr. W. WOOD (Chairman), Mr. O. E. P. WYATT, Mr. N. HEEPS, Mr. T. Y. CASTELL, J.P., Mr. F. W. NIGHTINGALE, Mrs. V. G. BORWICK, Mr. A. S. TARRANT, Mrs. ST. JOHN MILD MAY, Mr. S. GREEN, Mr. W. A. HOLLAND, Mr. H. KIMBELL, Mr. E. T. GARDNER, Mr. C. H. GRAVELEY, Canon J. HOTINE, Hon. Mrs. MACDONALD-BUCHANAN, Mr. T. W. WARD, Mrs. D. M. BARWELL-EWINS, J.P., Mr. G. G. CARRUTHERS, Mr. L. CAVE, Mr. T. H. SPOKES.

Public Health Officers of the Local Authority.

Medical Officer of Health :

Post vacant in 1949. (W. H. P. MINTO, M.B., Ch.B., D.P.H., appointed 1st March, 1950).

Senior Sanitary Inspector :

F. A. RUSSELL, F.F.S., M.S.I.A.

Assistant Sanitary Inspector :

R. S. LINLEY.

To the
Chairman and Councillors of the Rural District of Brixworth

MR. CHAIRMAN, LADIES AND GENTLEMEN,

As the post of Medical Officer of Health was vacant in 1949, I have to submit the Annual Report on the health and sanitary circumstances of the rural district for the year 1949.

The health of the people in the district, as far as can be judged by vital statistics, has remained satisfactory. The birth rate of 15·08 per thousand was rather less than the rate for the country, but is above the pre-war rates ; further, too much weight should not be given to small variations in this rate from one year to another, but attention should rather be paid to the trend of the rate over a period of years. The crude death rate of 11·82 per thousand is satisfactory, but the rate may well rise as the proportion of old people in the district increases. From the table on page 8 it will be seen that the four main causes of death are Heart Disease, Cancer, Intra Cranial Lesions, that is Cerebral Haemorrhage, and Bronchitis, all diseases which, in the most part, affect persons in their later decades of life.

To come now to infectious diseases. Measles was prevalent with 123 cases being reported. Whooping Cough followed with 107 cases, and Scarlet Fever with 50. There were 5 cases of Pneumonia and none of Poliomyelitis. As a rule the infectious diseases were of a mild type and only one death was recorded.

One can justifiably conclude then that the health of the district for 1949 was satisfactory.

As regards sanitary circumstances, progress was maintained and details are given in the report (Section C).

In the field of housing, the Council has continued with their post-war programme. The completion of 90 houses during the year, making a total of 200 since the beginning of the programme and a further 116 started is creditable. It is to be hoped that the day is not far

distant when the Council will have provided a house for every family and can then begin a strenuous campaign of slum clearance and re-housing, and at the same time, take effective steps to secure the improvement of property which can be made fit at reasonable expense.

I am,

Yours faithfully,

W. H. P. MINTO,

Medical Officer of Health.

August, 1950.

SECTION A

NATURAL AND SOCIAL CONDITIONS.

Area—(in acres) 82,944. The district is almost entirely rural in character, with agricultural and dairy farming as the main industries. In addition open-cast workings for iron-stone are to be found in the vicinity of Brixworth and Pitsford.

Population—The Registrar General has estimated the population for the mid-year 1949 to be 17,170, a decrease of 850 in the population for the previous year. The natural increase in population the excess of births over deaths, was 56.

Deaths—The total number of deaths assigned to the district for the year was 203 compared with 212 in 1948. The crude death rate based on the mid-year population was 11·82 compared with 11·76 in the previous year. The following table has been compiled for comparison with previous years :—

<i>Years</i>	<i>Total</i>	<i>Male</i>	<i>Female</i>	<i>Recorded Rate</i>
1943	241	122	119	14·93
1944	242	114	128	15·06
1945	187	87	100	12·04
1946	203	96	107	13·01
1947	211	110	101	13·46
1948	212	108	104	11·76
1949	203	99	104	11·82

In order to compare the mortality in the District with the mortality for England and Wales it is necessary to make a correction, to allow for the difference in age and sex distribution of the two populations. This is done by applying to the crude death rate of the District an “ Area Comparability Factor ” which has been estimated by the Registrar General as 0·82 for this District.

The Standardised Death Rate, therefore, is 9·69, which compares favourably with that of 11·7 for England and Wales.

All Causes ...						99	104	203
Still Births ...						1	2	3
Deaths of Infants under 1 year of age ...						4	4	8

Births—The number of live births assigned to this district was 259, compared with 262 in 1948. The rate per thousand of the population was 15·08, and is 1·62 below the rate for England and Wales.

Still Births—The number of still births during 1949 was three (1 male and 2 females). The rates for the past five years are given in the following table (per 1,000 live and still births) :—

Still Birth Rate.

			1945	1946	1947	1948	1949
Brixworth	21·05	30·96	11·69	41·9	11·45

Illegitimate Births—There were 11 illegitimate births assigned to the district during the year (7 males and 4 females), compared with 9 in 1948. Shown as a proportion of the total number of live births this represents 4·25 per cent.

Maternal Mortality—It is pleasing to record that no deaths occurred from puerperal causes, or conditions allied to childbirth.

Infant Mortality—The number of infants who died before reaching their first birthday was eight (4 male and 4 females). One was illegitimate.

Deaths under 1 year per 1,000 live births.

		1944	1945	1946	1947	1948	1949
Brixworth	...	40	53	31	30	44	31

SECTION B

GENERAL PROVISION OF HEALTH SERVICES.

Laboratory Service—Laboratory work in connection with the diagnosis and control of Infectious Diseases is carried out at the Emergency Public Health Laboratory in Northampton General Hospital.

Treatment Centres and Clinics—The following clinics staffed by members of the County Council Staff, are held at the places and dates indicated :—

Brixworth Infant Welfare.	3rd Friday	each month—Village Hall
Welford	„ „ 4th Wednesday	„ „ „ „
Boughton	„ „ 2nd Wednesday	„ „ Boughton Institute
Moulton	„ „ 1st Tuesday	„ „ Manfield Hospital

Ambulance Services—General medical and surgical cases are removed by the St. John Ambulance Brigade from Northampton, the Brigade acting as agents of the County Council under the arrangements made under Section 27 of the National Health Service Act, 1946. Infectious disease cases are also removed by the St. John Ambulance Brigade under the same arrangements.

Nursing in the Home—The County Council became responsible for these duties as from 5th July, 1948.

SECTION C

SANITARY CONDITIONS OF THE DISTRICT.

Water Supplies—During the year schemes for the provision of a piped water supply throughout the District have been further advanced. The Northern parishes scheme to supply Welford, Sulby, Sibbertoft, Clipston, East Farndon and Great Oxendon was completed.

The Eastern parishes scheme supplying Lamport, Draughton, Maidwell, Kelmarsh, Hanging Houghton, and Arthingworth has continued to progress very slowly but it should be completed early in 1950.

The Western parishes scheme for a mains supply to Cold Ashby, Thornby, Naseby, Haselbech, Guilsborough, Hollowell, Creaton, Spratton, Ravensthorpe, East Haddon, Teeton and Holdenby was commenced during the year and has proceeded satisfactorily.

The Mid Northants. Water Board, whose area of supply includes the whole of the Brixworth Rural District Council, came into being 1st July, 1949. The Council, however, are continuing to deal with all day to day matters in connection with water supply as agents for The Board, until such time as the necessary organisation has been set up by The Board to enable them to fully take over the Council's undertakings. Presumably when the next Annual Report is prepared this time will have arrived, but in handing over to The Water Board, their powers as a water undertaking, the Council will have the satisfaction of knowing that they themselves have been responsible for providing the whole of their District with a mains water supply.

Sewage Disposal—As the water supply schemes are completed the urgency for new schemes of sewerage and sewage disposal becomes more and more apparent. It is hoped that in view of the unsatisfactory condition of many of the Council's existing sewage outfalls new schemes will be proceeded with as expeditiously as possible.

During the year a Public Inquiry was held into the proposed scheme for the Kettering Road Moulton and Overstone, and the scheme was approved. Tenders were invited for the carrying out of the work and provisionally accepted, but unfortunately the Minister of Health

could not authorise the commencement of the work. In view of the urgency of the situation in this area it is hoped that the scheme will be put in hand with as little delay as possible.

A scheme for the resewering of Cold Ashby, approved in 1948, was commenced and the work proceeded very satisfactorily.

Schemes for Hannington, Holcot, Scaldwell, Old, Naseby, Walgrave and Welford were submitted to the Ministry in 1947, and were the subject of an Inquiry in September. The Schemes for Hannington, Holcot, Scaldwell, Old and Walgrave were not approved by the Ministry who made suggestions as to slight amendments necessary as the effluents will discharge into the streams above the proposed new Reservoir at Pitsford. The Welford scheme is to be carried out so as to facilitate the erection of further new Council Houses in that village.

Further schemes were submitted to the Ministry of Health, in respect of Sibbertoft, Great Oxendon, Clipston and East Haddon.

The Council's Consulting Engineers have also submitted for the Council's approval schemes for Boughton Village, Moulton Village, Church and Chapel Brampton, Boughton (Welford Road) and Harlestone.

Disinfection—Concurrent and terminal disinfection by means of gaseous and liquid disinfectants is carried out in homes where certain infectious diseases are notified. Throughout the year a number of requests for disinfection of premises were received and dealt with.

Disinfestation—In two cases disinfestation of premises was carried out following complaints of their verminous condition.

Eradication of Bed Bugs—No cases of infestation by bed bugs received treatment during the year.

Moveable Dwellings—No licences were granted by the Council under the Public Health Act 1936, Sec. 269.

Rats and Mice (Destruction) Act, 1919—The County Council, as the Authority under the Act, has delegated their powers as provided under Sect. 2 (2) to this Council. A number of rat infestations have been dealt with in conjunction with the County Pests Officer, employed by the Northamptonshire Agricultural Executive Committee. The Council's refuse tips are treated by the Northamptonshire Agricultural Executive Committee as necessary at an annual charge of £5 per tip.

SECTION D

INSPECTION AND SUPERVISION OF FOOD.

Milk and Dairies—In October 1949, control of milk production on the farm passed from the District Council to the Ministry of Agriculture and Fisheries with the coming into operation of the Food and Drugs (Milk and Dairies) Act, 1944. Simultaneously the licencing and supervision of pasteurising plants was placed in the hands of the County Council as the “Food and Drugs Authority.”

The District Council retains the duty of controlling the distribution and sale of milk.

At 31st September, 1949, the number of cowsheds on the Register was 187. Periodic inspections were carried out by the Sanitary Inspectors, usually coinciding with the visits for the purpose of milk sampling.

Cowsheds inspected	98
Cowsheds—defects found and remedied	2
Number of Milk Samples taken	66

Milk Sampling—Samples have been taken from dairies and during the course of delivery to the consumers until October, and submitted to the County Laboratory for tests for cleanliness and keeping qualities.

The test used is the Methylene Blue Reduction Test.

The results were as follows :—

Month	Number	Good	Moderate	Bad
January	10	10	—	—
February	5	4	—	1
March	11	8	3	—
April	—	—	—	—
May	5	2	2	1
June	12	1	5	6
July	6	4	2	—
August	5	1	1	3
September	6	1	1	4
October	6	3	3	—
TOTALS	66	34	17	15

Food Premises—Food Premises were inspected at frequent intervals throughout the year.

Meat Inspection—Owing to the fact that meat is now slaughtered in Northampton and Market Harborough and sent out to the various butchers within the District, very little meat is now inspected. From time to time unsound meat is reported to the Sanitary Inspector and is then examined.

Careful attention is being paid to the method of delivering meat to the District, in some cases the vans delivering meat have been found to be unsatisfactory, but during the year the general standard of cleanliness has shown some improvement.

13th September, 1950.

Annual Report of the Medical Officer of Health for the year 1949.

Erratum.

SECTION E

PREVALENCE OF AND CONTROL OVER, INFECTIOUS AND OTHER DISEASES.

Notification of the following infectious diseases were received during the year. Period distribution and parish distribution tables are to be found at the end of the report.

<i>Disease</i>	<i>Male</i>	<i>Female</i>	<i>Total</i>	<i>Rate per 1000 population .</i>	
				<i>Brixworth</i>	<i>Eng. and Wales</i>
Acute Primary					
Pneumonia ...	2	3	5	0.29	0.80

Malaria ...	—	2	2	0.12	—
TOTALS ...	134	154	288		

Scarlet Fever—Fifty cases were reported during the year. One death was recorded.

Paratyphoid Fever—Two cases were notified during the year.

Diphtheria—There were no cases of Diphtheria during the year.

Diphtheria Immunisation—With the coming into force of the National Health Service Act, 1946, on 5th July, 1948, the responsibility for Diphtheria Immunisation was transferred from the District Authority to the County Council.

Immunisation is carried out at all Infant Welfare Centres in the District, viz.: Welford, Brixworth, Moulton and Boughton, and also at sessions of school medical inspection when required.

Application for immunisation can be made to the County Council Health Visitor, or arrangements can be made with private general practitioners under the National Health Service Act, 1946.

Measles—123 cases were notified during the year. The infection was of a mild type and no deaths were reported.

Whooping Cough—107 cases of whooping cough were notified and no deaths were notified.

Poliomyelitis—No cases of Poliomyelitis were notified during the year.

Tuberculosis—

	<i>Males</i>		<i>Females</i>	
	<i>Pul.</i>	<i>Non Pul.</i>	<i>Pul.</i>	<i>Non Pul.</i>
